

MD 1
3. (Once Amended) The soluble film preparation according to claim 1, in which the drug is a compound which can be enhanced in internal absorption by the conversion to a solid solution.

Subt C2
4. (Once Amended) The soluble film preparation according to claim 3, in which the compound is nilvadipine.

A1
5. (Once Amended) The soluble film preparation according to claim 1, in which the edible polymer is one selected from the group consisting of synthetic polymers, cellulose derivatives and natural polymers.

Comp 1
6. (Once Amended) The soluble film preparation according to claim 1 or 5, in which the edible polymer is at least one selected from the group consisting of poly(vinylpyrrolidone), hydroxypropyl methyl cellulose, hydroxypropyl cellulose, methyl cellulose, hydroxyethyl cellulose and ethyl cellulose.

Subt E3
8. (Once Amended) The soluble film preparation according to claim 1, in which the oligosaccharide is starch syrup.

A2
9. (Once Amended) The soluble film preparation according to claim 8, in which the starch syrup is reducing maltose starch syrup.

Subt 1
10. (Once Amended) The soluble film preparation according to claim 1, in which the drug is a compound which can be enhanced in internal absorption by the conversion to a solid solution, the edible polymer is one or more of poly(vinylpyrrolidone) and hydroxypropyl cellulose, and an additional edible polymer, and the oligosaccharide is starch syrup.
